Flatlock Stitch

The flatlock stitch is suitable for wetsuits usually worn in warmer weather conditions, made of neoprene up to 3mm thickness.

Two pieces of neoprene are butted against each other edge to edge and the stitching goes back and forwards side-to-side, creating a very flat stitch (flatlock). You can very easily identify the flatlock stitch on the suit, by the thread on both sides of a wetsuit. Also, the flatlock stitch does not irritate the user's skin, as it would if the seam ran inside the suit.

Stitching
Glued Seam
Neoprene

Blindstitch

The blindstitch is the perfect solution for the manufacturing of winter wetsuits, since it is a totally waterproof stitch. Two pieces of neoprene are butted against each other and stitched together, with the needle going only half way through the neoprene before going back out. In this way, there is no stitch on the outer part of the wetsuit. The edges of the neoprene are also glued when they are butted together before stitching, for creating an even more waterproof seam. Lastly, the blindstitch does not irritate the skin of the user, as the seam does not run inside the suit.

Fishing Clothes

Fishermen's Jackets and trousers

Fishermen's Jackets and Trousers have a 0,35mm double PVC coating on the inside of the fabric to make it 100% waterproof and on the outside to provide extra durability. Even fish blood and grease are fairly easy to clean. Instead of seam stitching, the different garment parts are "glued" as a second security to make it 100% waterproof. The Lalizas Fishermen gear is designed to minimize the possibilities for nets to get caught while working. They feature full front flapped zipper and inner hand cuffs. The pants have a high bib at the front and back with elastic adjustable belt straps with buckle closure.
